

THE SOCIETY OF  
ADVOCATES IN ABERDEEN

## CARMELITE DIG TALK

Aberdeen Carmelite friary is first mentioned in documents in 1273 and is one of 4 medieval friaries known in the City. Excavations in 1980-1 and 1994 prior to redevelopment of the Green revealed a well-preserved church, domestic buildings and over 300 burials. The talk will consider in detail this friary and compare it to the other two Alison has excavated - the Blackfriars (Robert Gordon's College, Schoolhill) and Greyfriars (Marischal College).

Speaker: Alison Cameron B.Tech (Hons) Bradford, Archaeological Sciences; MCIfA, FSA Scot Cameron Archaeology Ltd.

We will meet in our library at 7pm on **Wednesday 27<sup>th</sup> February 2019**. The cost is **£8 per person**, which will include refreshments.

The attached form should be submitted with the requisite cheque in payment upfront or complete a BACS and confirming email in the usual manner.

We look forward to seeing you on the night.
